Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE SPECIFICATION:

Page 2, line 3, after "2000" insert -- now U.S Patent number 7,003,152--.

IN THE CLAIMS:

Cancel claims 1-20 and 26-34.

21. (original) An image processing apparatus for processing image data indicating a density of each pixel of an image, the apparatus comprising"

an edge detecting portion for detecting an edge area in the image in accordance with the image data;

an edge enlarging portion for enlarging the edge area detected by the edge detecting portion;

a density correcting portion for increasing or decreasing the density of the image data of the edge area enlarged by the edge enlarging portion; and

a detecting portion for detecting a monochrome and color ratio of the image data, wherein the edge enlarging portion changes the enlarging degree in accordance with the

detected result of the detecting portion.

22. (original) The image processing apparatus according to claim 21, wherein the edge detecting portion includes a first order differential filter for operating the first order differential of the image data so as to determine the edge area whose first order differential is larger than a predetermined value.

23. (original) The image processing apparatus according to claim 21, wherein the image data includes a black component and color components, and the density correcting portion increases a density of the black component and decreases the densities of the color components.

24. (original) The image processing apparatus according to claim 21, wherein the edge enlarging portion enlarges the edge area inside the image but does not enlarge outside the image.

25. (original) The image processing apparatus according to claim 24, wherein the edge enlarging portion decides the inside and the outside of the image in accordance with the lightness component of the image data.

Reasons for Allowance

2. The following is statement of reasons for allowance of claims 21-25:

The present invention is an image processing apparatus for processing image data indicating a density of each pixel of an image. Independent claim

Art Unit: 2624

21 identifies distinct limitation "a detecting portion for detecting monochrome and color ratio of image data, wherein the edge enlarging portion changes the enlarging degree in accordance with the detected result of the detecting portion. The closest prior art to Katayama et al. (U.S 5,361,147) and Tanaka et al. (US 5,548,415) show detecting edge, enlarging the edge area and correcting density of edge area but fail to anticipate or render the above limitation obvious when taken singularly or combination.

Communication

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherali Ishrat whose telephone number is 571-272-7398. The examiner can normally be reached on 8:00 AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Bella can be reached on 571-272-7778. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
